CEREAL CHEMISTRY®

Subject Index to Volume 89

Page numbers of errata are in italic.

α-Amylase, influence of particle size on bread quality and iron availability, 223
Antioxidants
—from tartary buckwheat bran, bioguided fraction of ethanol extract, 311
—Tibetan hull-less barley as potential source of, 290
Arabinoxylans, wheat grain, quantification of with phloroglucinol colorimetric assay, 143, *265*

Barley
—black, blue, and yellow, free and bound phenolic acids and total phenolics, contribution to free radical scavenging capacity and, 198
—Tibetan hull-less, as potential source of antioxidants, 290
Beans
—cooking, roasting, and fermentation of for fortification of leavened bread, 269
—precooked pinto, navy, red, and black, effects of extruder screw speeds on physical properties and in vitro starch hydrolysis of, 176
Biscuits, effects of milk, corn starch, and baking conditions on the starch digestibility, gelatinization, and fracture stress of, 205
Bran
—buckwheat, bioguided fraction of antioxidant activity of ethanol extract from, 311
—fermented wheat, as functional ingredient in baking, 126
—influence of particle size on bread quality and iron availability, 223
—oat cereals, processed to vary in molecular weight, glycemic response to, 255
—from specialty sorghum varieties, effects on in vitro starch digestibility of soft and hard sorghum endosperm porridges, 190
Breads
—influence of added enzymes and bran particle size on quality and iron availability, 223
—leavened, cooking, roasting, and fermentation of chickpeas, lentils, peas, and soybeans for fortification of, 269
—modeling of dough mixing profile under thermal and nonthermal constraint for evaluation of breadmaking quality of hard spring wheat flour, 135
—stress relaxation of wheat kernels and, 211
—thermostable ice structuring proteins from Chinese privet and properties of frozen bread dough, 162
Buckwheat, bioguided fraction of antioxidant activity of ethanol extract from, 311

Carotenoids, spectrophotometric screening of in corn flours, calibration for, 100
Cereals, gluten-free, effects of germination on nutritional profile of, 1
Chickpeas, cooking, roasting, and fermentation of for fortification of leavened bread, 269
Chinese privet, thermostable ice structuring proteins from, frozen bread dough properties and, 162
Colorimetric assays, for quantification of wheat grain arabinoxylans, 143, *265*
Cookies, physicochemical and rheological properties of Chinese soft wheat flours and their relationships with quality of, 237
Corn
—flours, spectrophotometric screening of total carotenoids in, calibration for, 100
—starch digestibility, gelatinization, and fracture stress of biscuits and, 205
—*Stenocarpella maydis* on, kernel composition and conversion into ethanol, 15
—yellow dent, effect of harvest moisture content on dry-grind fermentation characteristics and DDGS composition, 217
—yellow dent, effects of harvest moisture and frozen storage times on wet-milling yields and starch pasting properties of, 104
Corn starch, digestibility, gelatinization, and fracture stress of biscuits and, 205

Distillers dried grains with solubles (DDGS)
—effect of harvest moisture of yellow dent corn on, 217
—functional attributes of proteins withdrawn from different stages of a commercial ethanol fuel/distillers dried grains with solubles process using a wheat feedstock, 185
—gliadin and glutenin proteins withdrawn from different stages of commercial process using a wheat feedstock, 276
Dry-grind process, effect of harvest moisture of yellow dent corn on, 217

Endosperm texture, influence of instrument rigidity and specimen geometry on calculations of compressive strength properties of wheat endosperm, 24
Ethanol
—gliadin and glutenin proteins withdrawn from different stages of commercial process using a wheat feedstock, 276
—influence of *Stenocarpella maydis* infected corn on the composition of corn kernel and its conversion into, 15
—from ozone-treated tannin grain sorghum flour, 30
—from tartary buckwheat bran, bioguided fraction of antioxidant activity from, 311
Extruder screw speed, effect on physical properties and in vitro starch hydrolysis of precooked pinto, navy, red, and black bean extrudates, 176
Extrusion cooking, for manufacture of third-generation snacks with winter squash flour, 65

Falling number, of ungerminated soft white winter wheat, effect of grain protein concentration on, 307
Fermented wheat bran, as functional ingredient in baking, 126
Ferulic acid, free and linked to different carbohydrates in cereal products, methodology for determining, 247
Flour
—corn, spectrophotometric screening of total carotenoids in, calibration for, 100
—hard spring wheat, modeling of dough mixing profile under thermal and nonthermal constraint for evaluation of breadmaking quality of, 135
—oat, evaluation of white salted noodles enriched with, 117
—oat, extraction of β-glucan from for soluble dietary fiber quality analysis, 230
—ozone-treated tannin grain sorghum, ethanol-production performance of, 30
—soft wheat, quality factors associated with sponge cake sensory tenderness, 79
—wheat (suspensions), effects of phosphate salts on pH values and RVA pasting parameters of, 38
—wheat, effect of allelic variations in *Wx-1*, *Glu-D1*, *Glu-B3*, and *Pinb-D1* loci on characteristics of, 296
—wheat, high-molecular-weight glutenin subunit allelic composition and tortilla quality, 155
—winter squash, extrusion cooking for manufacture of third generation snacks with, 65
Free radical scavenging capacity, free and bound phenolic acids, and total phenolics in black, blue, and yellow barley and, 198
Frozen storage time, of yellow dent corn, effects on wet-milling yields and starch pasting properties, 104

Germination, effects on the nutritional profile of gluten-free cereals and pseudocereals, 1
Gliadin, withdrawn from different stages of commercial ethanol fuel–distillers dried grains with solubles process using a wheat feedstock, extractability and molecular modification of, 276
β-Glucan
—effect on technological, sensory, and structural properties of durum wheat pasta, 84
—extraction of from oats for soluble dietary fiber quality analysis, 230
—oat-enriched cereals processed to vary in molecular weight, glycemic response to, 255
—Rapid Visco Analyzer as tool for measurement of viscosity, 52
—variation in fine structure, extractability, and flour slurry viscosity in oats due to genotype and environment, 242
β-Glucanase, detection, localization, and variability of endogenous in wheat kernels, 59
Gluten, effects of germination on the nutritional profile of gluten-free cereals and pseudocereals, 1
Glutenin
—high-molecular-weight subunit allelic composition, effect of on wheat flour tortilla quality, 155
—withdrawn from different stages of commercial ethanol fuel–distillers dried grains with solubles process using a wheat feedstock, extractability and molecular modification of, 276
Glycemic response, to extruded oat bran cereals processed to vary in molecular weight, 255
Grain sorghum flour, ozone-treated tannin, ethanol production performance of, 30

Ice structuring proteins, from Chinese privet, properties of frozen bread dough, 162

Iron availability, influence of added enzymes and bran particle size on quality and, 223

Lentils, cooking, roasting, and fermentation of for fortification of leavened bread, 269

Maize starch, commercially produced, nonhost protein content in, 262
Milk, starch digestibility, gelatinization, and fracture stress of biscuits and, 205
Milling
—of hard-type common wheats, purolindoline b gene and, 44
—stress relaxation of wheat kernels and, 211
Mixing profile, modeling of under thermal and nonthermal constraint for evaluation of breadmaking quality of hard spring wheat flour, 135
Moisture content
—of yellow dent corn, effects on dry-grind fermentation and DDGS composition, 217
—of yellow dent corn, effects on wet-milling yields and starch pasting properties, 104

Nighttime air temperature, effect on rice physiochemical and functional properties, 168
Nonhost proteins, in commercially produced rice and maize starches, 262
Noodles
—wheat, effect of allelic variations in *Wx-1*, *Glu-D1*, *Glu-B3*, and *Pinb-D1* loci on characteristics of, 296
—white salted enriched with oat flour, evaluation of, 117
Nutritional compounds, comparison of in premature green and mature yellow whole wheat, 284

Oat bran cereals, processed to vary in molecular weight, glycemic response to, 255
Oat flour
—evaluation of white salted noodles enriched with, 117
—extraction of β-glucan from for soluble dietary fiber quality analysis, 230
Oats
—enriched cereals processed to vary in molecular weight, glycemic response to β-glucan, 255
—variation in β-glucan fine structure, extractability, and flour slurry viscosity due to genotype and environment, 242

Pasta, durum wheat, effect of β-glucan on properties of, 84
Pasting properties
—of wheat flour suspensions, phosphate salts and, 38
—of yellow dent corn, effects of harvest moisture and frozen storage times on, 104
Peas, cooking, roasting, and fermentation of for fortification of leavened bread, 269
pH, wheat flour suspensions and, effects of phosphate salts on, 38
Phenolics, free and bound in black, blue, and yellow barley and their contribution to free radical scavenging capacity, 198
Phloroglucinol colorimetric assay, for quantification of wheat grain arabinoxylans, 143, *265*
Phosphate salts, effects of on the pH values and Rapid Visco Analyzer pasting parameters of wheat flour suspensions, 38
Phytases, influence of particle size on bread quality and iron availability, 223
Policosanol, in Korean rice cultivars, 151
Privet, Chinese, thermostable ice structuring proteins from, frozen bread dough properties and, 162
Protein, concentration in grain, effect on falling number of ungerminated soft white winter wheat, 307
Pseudocereals, gluten-free, effects of germination on nutritional profile of, 1
Puroindoline b gene, milling behavior of hard-type common wheats and, 44

Rapid Visco Analyzer (RVA)
—as effective rheological tool for measurement of β-glucan viscosity, 52
—wheat flour suspensions and, effects of phosphate salts on pasting parameters, 38
Rice
—effect of nighttime air temperature during kernel development on physiochemical and functional properties of, 168
—effect of postharvest elevated-temperature exposure on quality and functionality of, 109
—Korean cultivars, policosanol content in, 151
Rice starch, commercially produced, nonhost protein content in, 262

Solvent retention capacity, relationship to alveograph, farinograph, and cookie-baking performance of Chinese soft wheat flours, 237
Sorghum
—brans from specialty varieties, effects on in vitro starch digestibility of soft and hard sorghum endosperm porridges, 190
—ozone-treated tannin, ethanol production performance of flour, 30
Soybeans, cooking, roasting, and fermentation of for fortification of leavened bread, 269
Spectrophotometric screening, of total carotenoids in corn flours, calibration for, 100
Sponge cake, sensory tenderness, soft wheat flour quality factors associated with, 79
Sponge cake baking test, estimation of soft white wheat quality, 73
Squash, winter, extrusion cooking for manufacture of third-generation snacks with flour from, 65
Starch
—commercially produced rice and maize, nonhost protein content in, 262
—corn, effect of on starch digestibility, gelatinization, and fracture stress of biscuits, 205
—effects of extruder screw speeds on physical properties and in vitro starch hydrolysis of precooked pinto, navy, red, and black bean extrudates, 176
—in vitro digestibility of soft and hard sorghum endosperm porridges, bran from specialty sorghum varieties and, 190
—of yellow dent corn, effects of harvest moisture and frozen storage times on pasting properties, 104
Stenocarpella maydis, on corn, kernel composition and conversion into ethanol, 15
Storage, of yellow dent corn, effects on wet-milling yields and starch pasting properties, 104
Stress relaxation, of wheat kernels, relationship with milling, rheological, and breadmaking quality, 211

Tannins, ozone-treated grain sorghum flour, ethanol-performance production of, 30
Tartary buckwheat bran, bioguided fraction of antioxidant activity of ethanol extract from, 311
Temperature
—nighttime air, effect on rice physiochemical and functional properties, 168
—postharvest, effect on rice quality and functionality, 109
Tortillas, wheat flour, high-molecular-weight glutenin subunit allelic composition and quality of, 155

Waxy wheats, isogenic durum and common, FT-IR microspectroscopic genetic expression of waxy trait in, 94
Wet milling, of yellow dent corn, effects of harvest moisture and frozen storage times on, 104
Wheat
—bran, fermented, as functional ingredient in baking, 126
—detection, localization, and variability of endogenous β-Glucanase in kernels, 59
—feedstock, extractability and molecular modifications of gliadin and glutenin proteins withdrawn from different stages of a commercial ethanol fuel/distillers dried grains with solubles process using, 276
—feedstock, functional attributes of proteins withdrawn from different stages of a commercial ethanol fuel/distillers dried grains with solubles process using, 185
—flour, quality factors associated with sponge cake sensory tenderness, 79
—hard-type common, puroindoline b gene and milling behavior of, 44
—high-molecular-weight glutenin subunit allelic composition and tortilla quality, 155
—influence of instrument rigidity and specimen geometry on calculations of compressive strength properties of endosperm, 24
—isogenic durum and common, FT-IR microspectroscopic genetic expression of waxy trait in, 94
—premature green vs. mature yellow, comparison of nutritional compounds in, 284
—quantification of arabinoxylans with phloroglucinol colorimetric assay, 143, *265*
—soft white, sponge baking test procedure for quality assessment, 73
—stress relaxation of kernels and relationship with milling, rheological, and breadmaking quality of, 211
—ungerminated soft white winter, effect of grain protein concentration on falling number of, 307
—wheat (durum), effect of β-glucan on properties of, 84
Wheat flour
—effect of allelic variations in *Wx-1*, *Glu-D1*, *Glu-B3*, and *Pinb-D1* loci on characteristics of, 296
—physiochemical and rheological properties of and relationships with cookie making quality, 237
—suspensions, effects of phosphate salts on the pH values and Rapid Visco Analyzer pasting parameters of, 38
Winter squash, extrusion cooking for manufacture of third-generation snacks with flour from, 65
